☐ Yes – Go to next question

5.5 Is the dam authorised by an existing consent or the subject of a separate consent application?

☐ Yes – Provide details including consent number below

☐ No – Go to next question

Existing dams/weirs generally do not need a resource consent if they are less than 3 m high, do not restrict fish passage and the upstream catchment is less than 25 ha. If a dam is to be constructed it must also meet other standards relating to environmental effects during construction. Please refer to Rule 59 of the Regional Freshwater Plan or contact the Council for details of these additional standards.

This application must include information about the stream flow at the site during dry periods and the availability of water for allocation. This information will need to be obtained by undertaking flow gaugings during the summer if this has not been done previously. Please contact the Council's Hydrology Department to get advice about the existing flow record, and if necessary to make arrangements for the gaugings to be undertaken.

- 6.1 What is the mean annual low flow (MALF) at the take site? (*Obtain this from the Council Hydrology Department*)

_____ litres/second

- 6.2 What is your understanding of the availability of water for allocation from the stream?

7 Assessment of Environmental Effects

An assessment of environmental effects [AEE] in accordance with schedule 4 of the Resource Management Act 1991 must be provided with the application. The AEE detail must correspond to the scale of the effects that the activity may have on the environment.

Completing the AEE section of this form will be sufficient for most applications. However for activities with actual or potential effects that are significant, a separate comprehensive AEE report including specific investigations may be required.

Schedule 4 can be viewed at www.trc.govt.nz/resource-consent-application-forms

- 7.1 If the application is to renew a consent, summarise the monitoring that has been undertaken and the environmental effects as identified by that monitoring.

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

OR

☐ New Consent/No monitoring data

7.2 Comment on the possible detrimental effects on the environment of the proposed taking and any proposed structure described in question 5.7. Particular attention should be given to the effects on:

- Availability of water to downstream users
- The natural character of the river, lake or stream and visual aesthetics
- Cultural, spiritual, historic, recreational, scientific and amenity values
- Ecology (e.g. river and lake habitat, vegetation, fish and fisheries, wildlife)
- River flow

7.3 How will the adverse effects described in question 7.2 above be mitigated? Include details of any proposed minimum flow.

Adverse effects are usually mitigated by ceasing taking when the stream flow is below a certain flow (termed the 'minimum flow'). If that is proposed specify at what flow taking will cease, how you have determined that minimum flow to be appropriate and how you propose that flow to be monitored. If you do not propose to cease taking during low flow, please state that and the reasons.

7.4 Please note any other information that may assist the Council in processing your application.

8 Assessment of Part 2 Matters and Policy

An assessment of the activity against the matters set out in Part 2 of the RMA and against any relevant provisions of policy documents and regulations must be provided with the application. The assessment must be in sufficient detail to satisfy the purpose for which its required.

For most applications the brief assessment provided below will be adequate. However for activities with significant policy implications, or where a National Policy Statement is relevant, a specific more comprehensive assessment is likely to be required.

The proposal is consistent with Part 2 of the RMA (the focus of which is to promote sustainable management of natural resources) and the relevant Regional Plan. *The Regional Freshwater Plan for Taranaki* generally supports taking surface of water for irrigation if at least 2/3 of habitat at MALF is retained and particular regard is had for specific matters such as ecological and amenity values, existing and future needs, and the relationship of Tangata with the water body.

- ☐ I will adopt the RMA assessment above; or
- ☐ I will attach an alternative assessment

But generally it will be non-notified if there are no more than minor adverse effects beyond the adjacent land, and if written approval is obtained from all those people who are likely to be adversely affected in a minor or more than minor way. Council will determine the people who are likely to be adversely affected and you will have the option of obtaining their written approval so that your application can be non-notified. Anyone with a consent to take water downstream is very likely to be deemed adversely affected.

Purchase orders are not acceptable as payment for the deposit and we are unable to issue you an invoice/receipt until payment has been received. The final cost of processing is based on actual and reasonable staff time and disbursements spent processing the application. The final cost (less the deposit) is invoiced at the end of the application process, but there may also be interim invoices during the process.

Where there is more than one application required for the same proposal, an initial deposit is required for each application (non notified applications).

If the consent is notified, a larger deposit will be required. We will advise if the application is to be notified.

Withdrawn applications will incur the cost for work done up to the date of withdrawal.

Applications returned due to inadequate information will incur the cost of work done in receiving the application, assessing the information and returning the application.

All collection costs incurred in the recovery of a debt will be added to the invoice amount due. Overdue invoices will incur an interest charge of 12% per annum.
