

## Schedule 3 – Coastal water quality

This schedule identifies the areas within the coastal marine area where providing for consented discharges has led to localised degradation of water quality, resulting in restrictions to shellfish gathering and recreational bathing. Restrictions may also occur in other areas of the coast as a result of unauthorised discharges or natural degradation of water quality.

Table 1: Sites where use is restricted due to consented discharges leading to localised degradation of coastal water quality

Location	Reason	Restriction
Waiwhakaiho River mouth to the <b>Mangatī</b> Stream mouth	Discharge of treated municipal wastewater from the New Plymouth wastewater treatment plant, through marine outfall structure 450 m offshore north of the Waiwhakaiho River mouth.	Permanent restriction on collection of shellfish
Waitara embayment	Discharge of screened untreated municipal wastewater via the Waitara Marine Outfall, 1250 m offshore of the Waitara river mouth, during high flow events at the Waitara Pump Station	Temporary restriction on collection of shellfish Temporary restriction on recreational bathing
<b>Waihi</b> Stream (Hāwera) to <b>Tāngāhoe</b> River	Discharge of treated municipal wastes generated in the Hawera and Eltham townships, including treated meat processing and dairy industry wastes, through a combined marine outfall, 1845 m offshore, near Hawera.	Temporary restriction on collection of shellfish
