

Coastal Permit
Pursuant to the Resource Management Act 1991
a resource consent is hereby granted by the
Taranaki Regional Council

Name of
Consent Holder: New Plymouth District Council

Decision Date: 15 October 2024

Commencement Date: 6 November 2024

Conditions of Consent

Consent Granted: To erect a replacement bridge and a hard protection structure (rock revetment), and any associated occupation of coastal space, disturbance to the foreshore and seabed, and discharge of sediment

Expiry Date: 1 June 2059

Review Date(s): June 2030, June 2036, June 2042, June 2048

Site Location: Weld Road Recreational Reserve, Oakura

Grid Reference (NZTM) 1679803E-5669588N

Catchment: Whenuariki
Timaru

*For General, Standard and Special conditions
pertaining to this consent please see reverse side of this document*

General condition

- a. The consent holder shall pay to the Taranaki Regional Council (the Council) all the administration, monitoring and supervision costs of this consent, fixed in accordance with section 36 of the Resource Management Act 1991.

Special conditions

1. The exercise of this consent must be undertaken in general accordance with the information submitted in support of the application for consent 11174-1.0. In the case of any contradiction between the documentation and the conditions of this consent, the conditions of this consent shall prevail.
2. The rock revetment structure must be erected in general accordance with the tender issue plans, dated Feb 22, included in document #3254675 (Appendix B), provided to the Council on 11 March 2024. In the case of any contradiction between the drawing(s) and the conditions of this consent, the conditions of this consent shall prevail.
3. The consent holder must notify the Council in writing, at least 48 hours prior to commencement and upon completion of work. Notification must include the consent number, a brief description of the work, and the intended commencement date/completion date. Unless the Council advises that an alternative method is required, this notice must be served by completing and submitting the 'Notification of work' form on the Council's website (<http://bit.ly/TRCWorkNotificationForm>)
4. At least 2 days prior to commencing works, the consent holder (or their representatives) must request a meeting on site with a Council Officer directly responsible for monitoring compliance with this consent. The purpose of the meeting is for the consent holder to detail the proposed measures to achieve compliance with the conditions of this consent.
5. No works shall commence on site until an Erosion and Sediment Control Plan (ESCP) has been certified by the Council. The ESCP must be prepared in accordance with the current Erosion and Sediment Control Guide for Land Disturbing Activities in the Auckland Region (Guideline Document 2016/005, Incorporating Amendment 3), with specific reference to Section H – Works within the Coastal Environment, unless otherwise agreed upon by the Council. If there is any conflict between the ESCP and the consent conditions, the consent conditions shall prevail. The ESCP must provide all relevant information to the activity, including but not limited to, the following:
 - a. the timing of works;
 - b. good site practices;
 - c. access to and from the site for vehicles and machinery;
 - d. the staging of each area and how the staging relates to the erosion and sediment control devices;
 - e. the design criteria and dimensions of all key erosion and sediment control structures;
 - f. works monitoring, including routine monitoring, rainfall triggers and significant rainfall event contingencies;
 - g. identification of key roles and responsibilities for ESCP implementation;
 - h. spill contingency planning; and
 - i. stabilisation methods that will be used, including where and when.

Consent 11174-1.0

6. The site must be operated in accordance with the certified ESCP and any certified variation thereafter. Any amendments to the ESCP must be submitted to the Council for re-certification prior to commencing earthworks subsequent to those changes.
7. The consent holder must, as far as practicable, minimise disturbance of the foreshore and coastal marine area by:
 - a. completing all works as quickly as possible;
 - b. minimising the area and volume of disturbance;
 - c. reinstating any disturbed areas as quickly as possible.
8. Fish passage must be provided for in the Whenuariki Stream, during and after the completion of works.
9. The consent holder must take all practicable steps to prevent contaminants discharging to the foreshore or coastal marine area, including by:
 - a. checking any machinery for leaks, and ensuring that machine refuelling and fuel storage occurs where no fuel can enter a water body in the event of a spillage;
and
 - b. ensuring that machinery is not cleaned or stored on the foreshore or in the coastal marine area.
10. Any uncured concrete work carried out within the foreshore or coastal marine area must be completely separated from tidal and/or moving water.
11. The consent holder must undertake the works in accordance with the *Penguin Management Plan for Weld Road* (PMP), dated February 2024, document #3254675 (Appendix A), and any certified variation thereafter, in order to avoid any adverse effects on penguins or active penguin nests. Any amendments to the PMP must be submitted to the Council for re-certification prior to commencing works subsequent to those changes.
12. The consent holder must install signage in public view near the construction area. The signage must include, at a minimum:
 - a. a description of the works being undertaken;
 - b. the purpose of the works;
 - c. any safety precautions for the public; and
 - d. the construction schedule, including days and times when public access will be restricted.
13. The signage must be installed prior to commencing works, must remain in place for the duration of the works, and must be removed upon completion.
14. The consent holder must maintain unrestricted public access to the greatest extent practicable, except during construction activities or in areas where public safety would be endangered as a result of the works being undertaken.

15. In the event that any archaeological remains are discovered as a result of works authorised by this consent, the works must cease immediately at the affected site and tangata whenua and the Council, must be notified within one working day. Works may recommence at the affected area when advised to do so by the Council. Such advice must be given after the Council has considered: tangata whenua interest and values, the consent holder's interests, the interests of the public generally, and any archaeological or scientific evidence. The New Zealand Police, Coroner, and Heritage New Zealand Pouhere Taonga must also be contacted as appropriate, and the work must not recommence in the affected area until any necessary statutory authorisations or consents have been obtained.
16. Noise generated by work in the coastal marine area associated with undertaking activities authorised by this consent must meet the following:
 - a. the activities will not cause excessive noise (defined in Section 326 of the Resource Management Act 1991); and
 - b. any construction activities must comply with the requirements of *New Zealand Standard NZS 6803:1999 Acoustics – Construction noise*.
17. Within 2 months of completion of the structures authorised by this consent (the rock revetment and bridge), the consent holder must submit documentation to the Council as set out below:
 - a. A baseline "as built" survey plan of the structures authorised by this consent;
 - b. Written certification from a person with a professional qualification and proven current competence through registration on a national competence-based register, such as Chartered Professional Engineer (CPEng), confirming that the structures have been built in accordance with good engineering practice and in accordance with the conditions of this consent.
18. The consent holder must maintain the structures in a safe and sound state such that:
 - a. They do not fall into a state of disrepair and continue to function effectively for the purpose they were designed;
 - b. Their structural integrity is maintained;
 - c. There is no settlement or loss of foundation material; and
 - d. Erosion of the foreshore or seabed which has been demonstrated by monitoring to be a direct result of the rock revetment structure, is minimised as far as practicable.
19. Within 6 months of completion of the rock revetment structure, the consent holder must undertake monitoring of the foreshore and seabed in the vicinity of the structure in accordance with a Monitoring Plan that has been certified by the Council. The Monitoring Plan must identify the techniques, methodologies, procedures and reporting requirements that will determine compliance with condition 18 above.

Advice note: *Compliance with this condition would generally be achieved by using techniques, methodologies and procedures that align with those in the "Coastal Structure Monitoring Specification Report" prepared for the Taranaki Regional Council by Tonkin & Taylor Ltd November 2014. Compliance may also be achieved using other means provided they achieve an equivalent or greater level of survey accuracy and the results can be compared with those from the methods outlined in the Coastal Structure Monitoring Specification Report.*

Consent 11174-1.0

20. This consent lapses 5 years after its date of commencement, unless the consent is given effect to before the end of that period or the consent holder has applied for an extension before the end of that period or the Council fixes a longer period pursuant to section 125(1)(b) of the Resource Management Act 1991.
21. In accordance with section 128 and section 129 of the Resource Management Act 1991, the Council may serve notice of its intention to review, amend, delete or add to the conditions of this resource consent by giving notice of review during the month of June 2030 and every 6 years thereafter, for the purpose of ensuring that the conditions are adequate to deal with any adverse effects on the environment arising from the exercise of this resource consent, which were either not foreseen at the time the application was considered or which it was not appropriate to deal with at the time.

Signed at Stratford on 15 October 2024

For and on behalf of
Taranaki Regional Council

A D McLay
Director - Resource Management
